2	Drop test	One angle,three edges and six sides. 75cm above the ground(no weight difference)	Non operation state

**LIFE TIME**

Item	Description
1.	Functions, Performance, appearance, etc. shall be free from remarkable deterioration within 50,000 hours under ordinary operating and storage conditions room temperature (25±10°C) , normal humidity(45±20%RH),and in area not exposed to direct sun light.

**SPECIFICATION OF QUALITY ASSURANCE****1.1 Purpose**

This standard for quality assurance should affirm the quality of LCD module products to supply to ( Purchaser ) by VBEST ELECTRONIC LTD. ( Supplier )

**1.2 Standard for Quality Test**

1.2.1 Test method: According to MIL-STD-105E, General Inspection Level II take a single time.

1.2.2 Electronic Assemblies Standard is according to IPC-AA610 REV. C . CLASS 2

1.2.3 The defects classify of AQL as following list.

Classify	Inspect item	Nonconforming status	AQL	Remark
Critical defect	1.Display damage	( 1 ) Non-Display	AQL=0.65	Product no function
		( 2 ) Occur high current		
		( 3 ) Segment missing		
		( 4 ) LCD with wrong viewing direction		
		( 5 ) Back light unlighted		
	2.Dimension not correct	( 1 ) PCB and bezel out of specification	AQL=0.65	Can not assembly
Major defect	1.Display	( 1 ) Display scanned Disorder	AQL=1.0	--
		( 2 ) display defect		
	2.Back-light	( 1 ) Flash , duct		
		( 2 ) Wong color		
Minor defect	1.LCD	( 1 ) Dust ( Black spot , white spot )	AQL=2.50	Appearance defect
		( 2 ) Polarizer scratch		
		( 3 ) Reflective polarizer with bubble		
		( 4 ) Display segment transfigure		
		( 5 ) Color out of the range of sample color		
Total			AQL=2.50	

**1.3 NONCONFORMING ANALYSIS & DEAL WITH MANNERS****1.3.1 Nonconforming analysis :**

- Purchaser should supply the detail data of non-conforming sample and the improper state. After accepting the detail data from purchaser , the analysis of Nonconforming should be finished in two weeks. If supplier cannot finish analysis on time , must announce purchaser.

**1.3.2 Disposition of nonconforming :**

If the customer will find any defected product during assembly time , supplier will replace the good product for every defect after. Both supplier and customer should analysis the reason and discuss the disposition of nonconforming when the reason of nonconforming is not sure.

**1.4 Agreement items**

Both sides should discuss together when the following problems happen.

**1.4.1** There is any problem of standard of quality assurance , and both sides

Think that must be modified.

**1.4.2** There is any argument item which does not recorded in the standard of quality assurance.**1.4.3** Any other special problem.

## 1.5 Standard of the product appearance test

### 1.5.1 Manner of appearance test

- The test must be under 20W×2 or 40W fluorescent light , and the distance of view must be at 30cm.
- When test the model of transmissive product must add the reflective plate.
- The test direction is base on about 45° of vertical line.

- Definition of area :

A、 area : viewing area

B、 area: : out of viewing area(outside viewing area)

1.5.2 Standard of appearance inspection : ( Unit: mm )

## HANDLING PRECAUTION

### 1、 Mounting Method

The panel of the LCD Module consists of two thin glass plates with polarizes which easily get damaged since the Module is fixed by utilizing fitting holes in the printed circuit board. Extreme care should be taken when handling the LCD Modules.

### 2、 Caution of LCD handling & cleaning

When cleaning the display surface, use soft cloth with solvent (recommended below) and

Wipe lightly.

-Isopropyl alcohol

-Ethyl alcohol

-Trichlorotrifluoroethane

Do not wipe the display surface with dry or hard materials that will damage the polarize surface.

Do not use the following solvent :

-Water

-Aromatics

### 3、 Caution against static charge

The LCD Module use C-MOSLSI drivers, so we recommend end that you connect any unused input terminal to VDD or VSS, do not input any signals before power is turned on.

And ground your body, Work/assembly table. And assembly equipment to protect against static electricity.

### 4、 Packaging

-Modules use LCD elements, and must be treated as such. Avoid in tense shock and falls from a height.

-To prevent modules from degradation. Do not operate or store them exposed directly to sunshine or high temperature/humidity.

### 5、 Caution for operation

-It is indispensable to drive LCD's with in the specified voltage limit since the higher voltage than the limit shorten LCD life.

An electrochemical reaction due to direct current causes LCD deterioration, Avoid the use of -Response time will be extremely delayed at lower temperature than the operating temperature range and on the other hand at higher temperature LCD's show dark color in them.

However those phenomena do not mean malfunction or out of order with LCD's. Which will come back in the specified operating temperature range.

- If the display area is pushed hard during operation, some font will be abnormally displayed but it resumes normal condition after turning off once.

- A slight dew depositing on terminals is a cause for electro-chemical reaction resulting in terminal open circuit.

Usage under the relative condition of 40 , 50%RH or less is required.

## 6、 Storage

In the case of storing for a long period of time (for instance. For years) for the purpose or replacement use,

The following ways are recommended.

- Storage in a polyethylene bag with sealed so as not to enter fresh air outside in it, And with no desiccant.
- Placing in a dark place where neither exposure to direct sunlight nor light is. Keeping temperature in
  - the specified storage temperature range.
  - Storing with no touch on polarizer surface by the anything else. (It is recommended to store them as they have been contained in the inner container at the time of delivery)

## 7、 Safety

It is recommendable to crash damaged or unnecessary LCD into pieces and wash off liquid crystal by using solvents such as acetone and ethanol. Which should be burned up later.

When any liquid crystal leaked out of a damaged glass cell comes in contact with your hands, please wash it off well with soap and water.

## 8.TERMS OF WARRANT

### 1.Acceptance inspection period

The period is within one month after the arrival of contracted commodity at the buyer's factory site.

### 2.Applicable warrant period

The period is within twelve months since the date of shipping out under normal using and storage conditions.
